

Kalor AGUA Wi-Fi Module / #GO HEAT Smartphone App

Module layout

1. Green LED - Power
2. Blue LED - Access point
3. Orange LED - Internet
4. Orange LED - Remote server
5. Connection to stove
6. Power input
7. Reset button

Connection diagram

Connect the Wi-Fi module to a standard wall plug, with the included power supply, then connect the serial cable to your Kalor wood pellet stove.

Connecting the module to your Wi-Fi

Step 1

Hold the reset button for approximately 5 seconds. All the lights will flash sequentially.

Wait for the lights to stop (this make take several minutes).

Step 2

Through a device with a Wi-Fi connection (computer / tablet / smartphone), you must connect to the Wi-Fi network created by the Wi-Fi module (not to your home's Wi-Fi network).

The network (Fig 1) can be identified by the digits T009_ followed by the Mac address located on the back of the module.

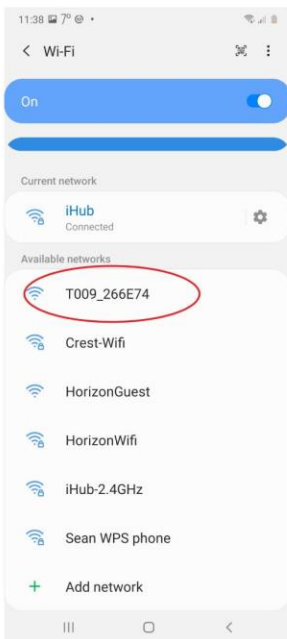

Fig 1

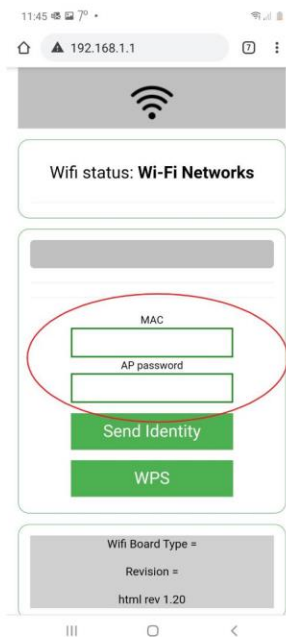

Fig 2

Step 3

Once connected to the module, open your internet browser and type in the following in the address bar <http://192.168.1.1>

Type in Mac address and AP password (located on the sticker attached to the manual) and choose “send identity” (Fig 2)

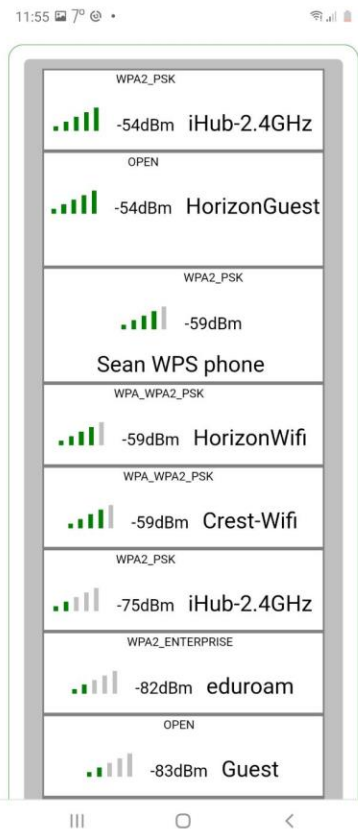

Fig 3

Fig 4

Step 4

A list of available networks will appear (Fig 3), choose the network that you want your module to be connected to (home/office network).

Insert the network password and select connect. A confirmation screen should appear (Fig 4) once successfully paired.

Once successfully paired, connect you computer / tablet / laptop to your home Wi-Fi before going onto the next step.

Setting up the #Go heat app

Step 1

Depending on your device download the #Go heat app from:

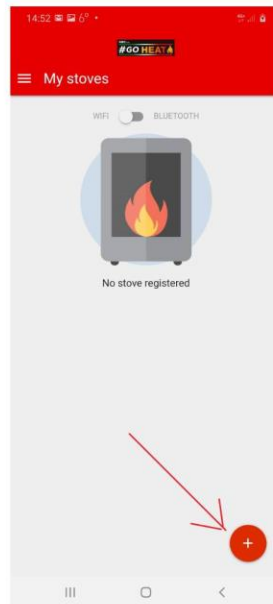

Step 2

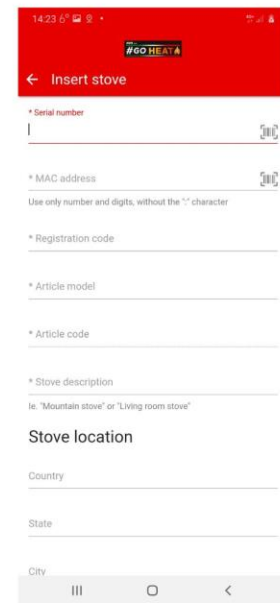

Subscribe by entering your email and new password

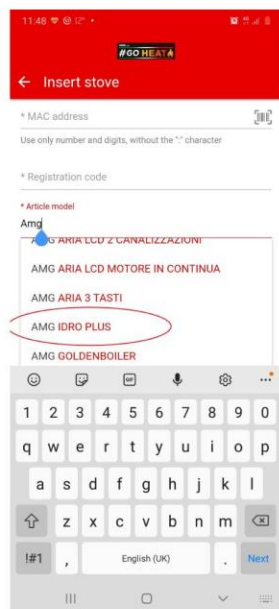

Add new stove by selecting "+" sign

Insert stove and module details
-Stove serial no (back of stove)
-Mac address (back of Agua module)
-Reg no (back of Agua module)

In the article model field, type "AMG" and select "AMG Idro Plus" from the drop down menu

Congratulations, you are now ready to control your wood pellet stove remotely
