- Carbon neutral – no carbon tax!
- Exceptional efficiency – up to 98%!
- Clean, convenient and readily available fuel, in bags or in bulk
- Control via your Smartphone
- Integrate with home heating controls
- Wide range of styles, types and colours

Heating with wood pellet

Enjoy steady heat and optimum comfort without the hassle. Press the button, sit back, relax and enjoy the flickering flames! Kalor wood pellet stoves are fully automatic with minimal intervention from the user, yet they provide fantastic heat and offer a beautiful, lively flame and a wonderful focal point for any room, large or small.

Elegant in design, convenient in operation, clean, environmentally friendly and very cheap to run, Kalor wood pellet stoves are rapidly becoming a choice heating source for many homeowners and it's easy to see why.

Kalor wood pellet stoves and boilers are the leading alternative to fossil fuels for simple space heating, for central heating and for hot water. Wood pellet systems are perfectly suitable to replace solid fuel systems, oil systems, gas systems and even heat pumps.

They are perfect for heating standard radiators, low temperature radiators, underfloor heating and hot water so they're just about the most flexible and easy to manage system on the market today.

All Kalor wood pellet stoves are tested and approved to all relevant standards, incl. TUV.

Installation & Maintenance

SALES NETWORK

The correct installation starts at your purchase! Contact one of our dedicated Authorised Dealers today, who will be delighted to discuss your needs with you and help you to choose a stove, appropriate to your needs. Find contact details for our extensive network of Authorised Dealers on our website –

www.woodpelletstoves.ie

TECHNICAL SUPPORT

With a dedicated technical support department, we are head and shoulders above our competition in terms of our back-up service to our customers.

COMMISSIONING

With a nationwide service for commissioning, we'll ensure that your new stove is set up correctly from Day One, meaning that it will work better, more efficiently and for longer. Trust us for your new wood pellet stove.

Correct installation of your new Kalor wood pellet stove is of the utmost importance. Installation, whilst very straight-forward and simple, should only be carried out by competent stove fitters (or plumbers in the case of boiler models). Always ask for credentials and/or references when choosing an installer.

For your convenience and peace of mind, we commission every stove and boiler that we sell.

The choice of installer is the sole responsibility of the homeowner who should do their own research with regard to choosing a reputable person/company.

NB: We do not endorse or recommend any particular installer but we can offer some names of installers in your area. See our website www.woodpelletstoves.ie

Commissioning

Commissioning is generally included with your purchase and is carried out by a qualified and experienced Kalor Technician, ensuring that your stove/boiler is set up correctly and your product warranty is valid. Commissioning also ensures product reliability and optimal efficiency and performance.

Spare Parts

We carry a full stock of stove and boiler spare parts, warehoused here in Ireland. This means that in the unlikely event of component failure, we will have you up and running again in no time at all.

OUR SERVICE TO OUR CUSTOMERS

The fuel: wood pellets

Wood pellets are environmentally friendly, extremely clean burning & cost-effective. Made from wood by-products such as sawdust, wood chips & other waste wood, wood pellets typically measure 6mm in diameter & are around 20mm long. Wood pellets are conveniently packaged in 10kg or 15kg bags for easy handling & can be purchased in your local hardware or fuel store.

Warranty

Your new stove carries a limited 2 year warranty which covers parts and labour for any defects in your stove.
